

LEARNING OUTCOMES OF M.ED. PROGRAM

- Describe the development of key educational theories and practices around the world;
- Analyze education situations using conceptual and empirical evidences on input, process and outcome;
- Demonstrate conceptual and theoretical principles and practices as intervention alternatives for educational development;
- Apply philosophical, sociological and psychological concepts and theories of education to support arguments for educational development;
- Plan, manage and monitor educational institutions and education program in different settings;
- Critically analyze educational problems and strategically propose policy options based on both theories and practices;
- Conduct educational research to monitor and improve practices at classroom level and beyond;
- Build character and moral performances to work professionally, creatively and collaboratively.

Why Study With Us?

- The majority of the lecturers are PhD degree holders from overseas universities;
- The majority of the lecturers actively conduct regular research to improve teaching and inform policy;
- Curriculum is updated on a regular basis and includes both theories and practices of contemporary education;
- Teaching approaches stress on development of knowledge in education and skills for work and life;
- The study of theories is enhanced by practical work either through supplementary lectures by practitioners in the fields and/or field visits;
- Strong students' support services (mentoring and academic professional consultation);
- The program is in good collaboration with
 - ◆ Ministry of Education, Youth and Sport and its subnational offices
 - ◆ Education NGOs and Civil Society
 - ◆ Embassies and Development Partners
 - ◆ Schools and Training Centers in Cambodia
 - ◆ Local and international universities

VISION

The faculty of education will be the leading institute in Cambodia committed to the teaching and learning of current knowledge and the development of new knowledge and skills for current and future educators and educational leaders.

This will be done through the provision of high quality academic education programs of study, engagement in research and involvement in service. These activities will contribute to the ongoing development of a theoretically informed and more equitable educational system in the country and in the broader region.

MISSIONS

The three-fold mission of the Program is to

- (1) provide high-quality teaching and learning opportunities to prepare professionals for leadership in a wide variety of educational careers;
- (2) engage in scholarly research and prepare scholars who can conduct academic research that addresses critical national and regional educational issues and
- (3) provide valuable service to the field through collaboration with other educational agencies, institutions, and scholars to contribute to the improvement of the education system in Cambodia and the region.
